Projected Net Worth: Graph

This report presents the key assumptions behind the income and asset projections for Harold J Jones and Marianne P Jones.

Key Rates

1. Inflation. 3.1 %
2. After-tax rate of return on Accumulated Savings (reinvested income). 3.0 %
3. Cost of borrowing (%) for net deficits. 8.0 %

Plan Start Date

1. The start year for plan is 2005.

Taxes

1. Federal taxes are calculated on a detailed basis using the tax laws for each year, including Earned Income Credit, Alternative Minimum tax, and phase-outs currently enacted.
2. Taxes for Harold J Jones
 - Federal and state filing status for 2005. Single
 - Filing status for subsequent years. Single
 - State taxes are estimated by applying the current tax table to gross income.
 - In Pennsylvania, alimony and retirement income are excluded from taxable income.
3. Taxes for Marianne P Jones
 - Federal and state filing status for 2005. Single
 - Filing status for subsequent years. Single
 - State taxes are estimated by applying the current tax table to gross income.
 - In Pennsylvania, alimony and retirement income are excluded from taxable income.

Assumptions Relating to Children

	<u>Custody</u>	<u>Tax Exemption</u>
1. Tiffany..	Marianne	Marianne
2. Amber..	Marianne	Marianne

Assumptions Relating to Child Support

1. Harold paying child support through 2023. \$ 1,726 per month

Assumptions Relating to Alimony

1. Harold paying alimony through 2009. \$ 150 per month

Residence Assumptions - 40 Winding Way

1. Market Value. \$450,000
2. Rate of appreciation of residence. With Inflation
3. This residence will not be sold in the time frame under consideration.
4. There is a first mortgage with a current mortgage balance of \$320,000.
5. This mortgage will be paid by Marianne.

Residence Assumptions - Vacation Home

1. Market Value. \$100,000
2. Rate of appreciation of residence. With Inflation
3. This residence will not be sold in the time frame under consideration.

4. There is a first mortgage with a current mortgage balance of \$18,750.
5. This mortgage will be paid by Harold.

Assumptions Relating to Wages

	<u>Harold</u>	<u>Marianne</u>
1. Wage amount and period.	\$175,000 / year	\$950 / week
2. Rate of increase of wages.	With Inflation	With Inflation
3. Retirement age.	65	65

Assumptions Relating to Major Expenses

1. Tiffany's prep school expense will start on 9/1/2004, run for 8 years.
 The annual cost is \$18,000 in present dollars, and will increase at a rate of 5.0%.
 Marianne P Jones will pay 100% of this expense.
2. Amber's prep school expense will start on 9/1/2007, run for 8 years.
 The annual cost is \$18,000 in present dollars, and will increase at a rate of 5.0%.
 Marianne P Jones will pay 100% of this expense.

Assumptions Relating to Cash & Investments

1. First Union: The current market value is \$1,875.
 The annual income from this asset is \$0. The annual rate of appreciation is 0.0%.
2. Vanguard Index 500: The current market value is \$12,755.
 The annual income from this asset is \$1,000. The annual rate of appreciation is 8.0%.
3. Florida Condo: The current market value is \$45,000.
 The annual income from this asset is \$8,000.

Assumptions Relating to IRAs and 401(k) Plans

1. Vanguard IRA. The current value is \$12,555, and the growth rate is 5.0%.
 Retirement age for Harold J Jones is 65.
 Harold J Jones will take minimum distributions at retirement.

Assumptions Relating to Defined Benefit Pensions

1. AMFAC Teacher's Assn.
 The plan is owned by Marianne P Jones.
 The monthly benefit specified by the plan is \$725.
 This assumes the employee works until the cut-off date and begins receiving payments at age 65.
 The discount rate is 4.95%.
 We are using mortality table GAR-94.

Assumptions Relating to Debts

1. MasterCard Bank Two. The current balance is \$3,456. The current rate is 12.00%.
 The monthly payment is \$75.00.
2. VISA Country Card. The current balance is \$775. The current rate is 14.00%.
 The monthly payment is \$120.00.

Footnotes:

(1) 40 Winding Way - Marianne will remain in the marital home.

No residences are indicated as being sold.

To indicate a residence as being sold, enter a year of sale with the residence information.

This valuation is for the plan: AMFAC Teacher's Assn.

This report values the plan as of the evaluation date, which is: 5/5/2005.

Based on the information entered (see below), the value of the pension as of the evaluation date is:

\$23,207, using the GAR-94 mortality tables and a gender-specific approach.

As of 5/5/2005, 100.00% of this pension is so-called 'marital property.'

The "marital amount" is typically the amount the judge will divide. (The rest stays with the employee.)

Using a gender-specific approach, the marital amount of the pension plan is \$23,207 (that is, 100.00% of \$23,207).

Using a gender-specific approach, if the judge divides the pension 50/50, say, then \$11,603.50 (half of \$23,207) would be awarded to each spouse.

These comments about marital property apply in most states, even community property states.

Value of Pension at Retirement:

The value of the pension is \$123,647 (gender-specific approach) as of regular retirement age.

This is typically more than the value as of the evaluation date because, like money in a bank account, a pension's value increases over time.

Knowing the value at earliest retirement age tends to be most useful if the worker is near retirement, or is likely to reach retirement with this company.

If the non-worker spouse is considering taking a share of the payout, as opposed to a cash buyout today, this number helps both spouses see what that payout might be.

This report is based on the following data entered:

Key Dates:

11/20/1973	Employee's birth date.
3/7/1995	Date the employee was married.
3,694	Number of days from marriage to separation.
4/5/1998	Date the employee started in the plan.
4/17/2005	Date the employment stopped being 'marital.' (This is usually the separation date).
5/5/2005	Date to evaluate the plan. (This is usually today or trial date).
65	Employee's regular retirement age.
62	Employee's earliest retirement age.
NO	Is the employee already retired?

The Plan:

- \$ 725 Monthly benefit, estimated outside the software, at "as if" retirement date.
- 1.0% Cost of living adjustment (COLA) percent.
- 4.95% Interest rate (also known as the "discount rate").

Calculation Options Selected:

The pension benefit and marital portion are calculated "as if" the employee works until the cut-off date.

"Cut-off" means the date after which the plan is no longer marital. This is typically the separation date.

The pension's value is calculated assuming the employee retired or will retire on the regular retirement date.

The employee is a female.

Accumulated Savings Report

Accumulated Savings report for Harold J Jones or Marianne P Jones.

Accumulated Savings is the account for reinvested earnings that are not spent, and also for deficits (negative Accumulated Savings), which reflect borrowing to cover expenses and taxes.

Residence sale and refinance proceeds and downpayments affect Net Worth through additions to or subtractions from the Accumulated Savings account.

Liquidations of assets increase the Accumulated Savings account by offsetting deficits which would otherwise have to be covered by borrowing.

Liquidations to Cover Negative Cash Flow Report

Liquidations to Cover Negative Cash Flow report for Harold J Jones or Marianne P Jones.

The "liquidation" amount is the amount of investments and IRA/401(k) that is used to cover negative cash flow (expenses in excess of income) and downpayments on homes to be purchased in the future.

The software first sells securities, then distributes from the IRA/401(k) plan(s).

Upon each liquidation sale, the software sells a bit extra to pay for taxes on the sales.

Data Entries:

- YES Distribute accumulated savings to cover downpayment?
- YES Sell securities to cover downpayment?
- YES Distribute accumulated savings to cover negative cash flow?
- YES Sell securities to cover negative cash flow?
- YES Distribute from IRA/401(k) to cover negative cash flow?

Liquidations of Securities and IRA/401(k):

Assets Used to Cover Negative Cash Flow

This report shows each asset that is being liquidated.

For each asset, it shows the amount liquidated, the tax basis of the amount liquidated, the gain on the liquidation sale, the tax paid on that gain, and the after-tax amount available to cover the cash flow deficit.

The tax rate used is a federal capital gains rate of 15.0% plus a state tax rate of 3.07%, for a combined tax rate of 18.07%.

Pennsylvania

Pennsylvania has a single tax rate of 3.07 %.

State tax in Pennsylvania is based on Federal Gross Income.

Harold	Marianne	
187,500	57,700	Federal Reference Income. Amount of Federal gross, AGI, or taxable income, as in
<u>5,756</u>	<u>1,716</u>	State Tax Amount. Federal reference income * state tax rate shown above.

For Pennsylvania, alimony and retirement income are added back to Federal Gross Income before applying the tax rate.

Wages and salary report for Harold J Jones or Marianne P Jones.

For each party whose wages show level or steady growth, data entries with respect to wages and salaries are annualized, then increased by inflation or other percent specified.

Data Entries:

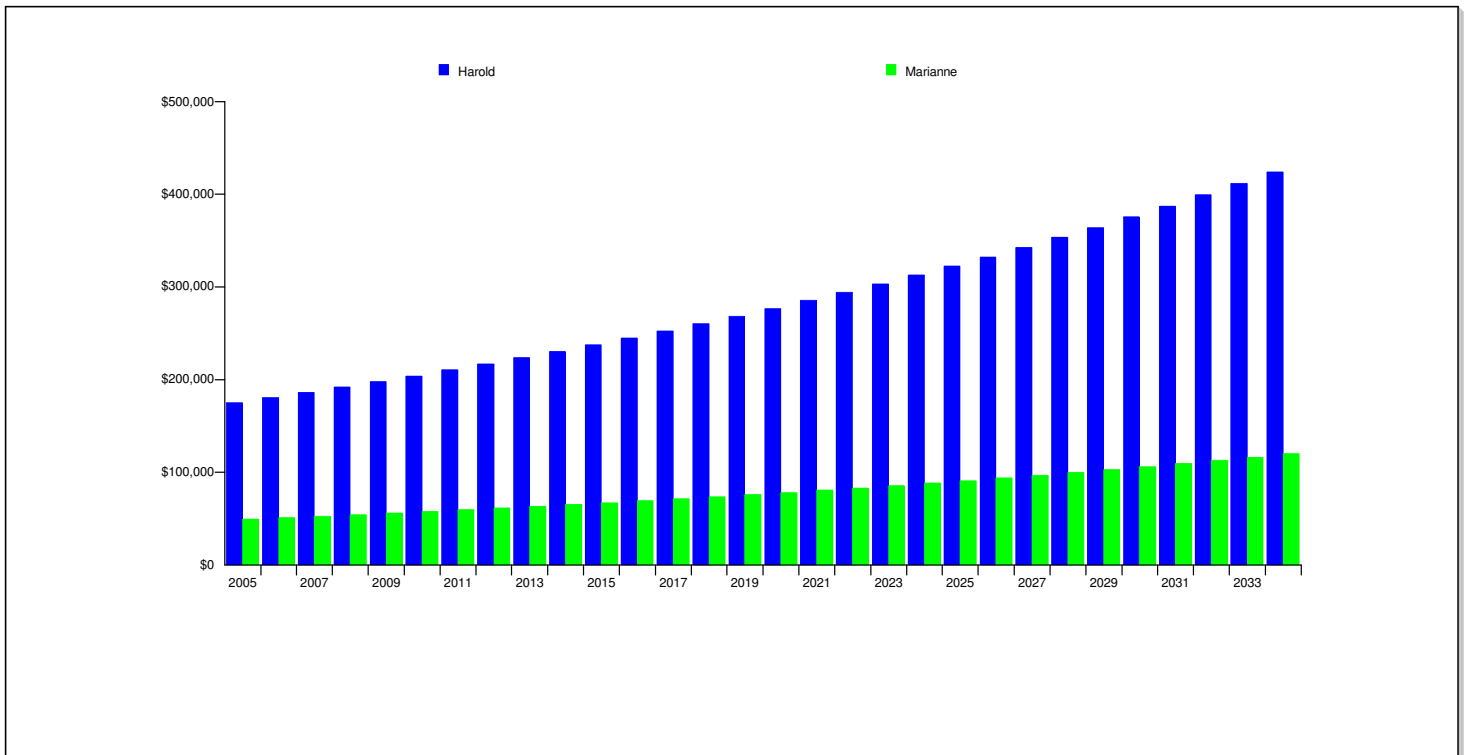

Harold's wages will be level or show steady growth for a period of years.
 Harold's wages are \$175,000 per year.
 Harold's wages will increase with inflation (3.1% per year) until retirement.
 Harold will retire at age 65.

Marianne's wages will be level or show steady growth for a period of years.
 Marianne's wages are \$950 per week.
 Marianne's wages will increase with inflation (3.1% per year) until retirement.
 Marianne will retire at age 65.

Financial Investment Income Report

Financial investment report for Harold J Jones or Marianne P Jones.

Totals in this report are the amount of annual income entered for each financial investment asset, increased by the growth rate for the asset.

The categories are interest, dividends, capital gains, or tax-free, as selected.

If ownership of the asset is divided, the allocation reflects that division.

Data Entries:

Graph of Total Real Estate Income Per Year:

Social Security Income Report

Social security income report for Harold J Jones or Marianne P Jones.

Totals in this report are based on the social security benefit entered.

This increases each year by inflation, if it is indicated that benefits should be adjusted for inflation.

If a party retires before regular retirement age, the amount received will be reduced, per formulas specified by law, from the benefit entered for regular retirement age.

If a party retires after regular retirement age, the amount received will be more than the amount entered for regular retirement age, again per formula.

The law specifies that "retirement age" itself varies between 65 and 67, depending on the year and month of a party's birth.

Data Entries:

Harold:

- NO Is Harold receiving Social Security payments yet?
- Regular Best guess retirement age.
- 67 Retirement age used in calculations.
- \$0 Projected annual benefit if Harold retires at regular retirement age.
- NO Does Social Security increase with inflation?

Marianne:

- NO Is Marianne receiving Social Security payments yet?
- Regular Best guess retirement age.
- 67 Retirement age used in calculations.
- \$0 Projected annual benefit if Marianne retires at regular retirement age.
- NO Does Social Security increase with inflation?

IRA/401(k) payouts report for Harold J Jones or Marianne P Jones.

This report describes regular IRA retirement distributions, not liquidating distributions. Liquidating distributions occur when the software automatically distributes from the IRA to cover an income shortfall.

Securities, and IRAs used to cover expenses in excess of income are shown in the report entitled "Liquidations to Cover Negative Cash Flow."

Totals in this report are calculated as follows:

- Start with the current value of the investment.
- Calculate self and spouse portions, based on the percent entered.
- Subtract any distribution and account fee in 2005.
- Increase what is left by the growth rate specified until the age at which distributions are specified to begin.

If that is within our 30 year time frame, distributions are shown.

If "minimum distributions" are specified, the minimum allowed by law per year is calculated.

Otherwise, each year the specified amount is distributed. This continues for 30 years, or until the fund is fully distributed.

After each distribution, the remaining balance is increased by the growth rate.

Data Entries:

Vanguard IRA

\$12,555 Current value of account (dollars).
5.0% Growth rate of account specified (percent).

Harold:

\$12,555 Dollar amount allocated to Harold.
\$0 Distribution to Harold in the current year (dollars).
65 Age at which distributions to Harold should start.
Minimum Desired distribution size for Harold.

Marianne:

\$0 Dollar amount allocated to Marianne.

Defined Benefit Plan Payouts Report

Defined benefit plan payouts report for Harold J Jones or Marianne P Jones.

This amount is calculated as follows:

- Both the annual and lump sum values are based on the value of the plan at retirement.
- If there is more than one defined benefit plan, these numbers reflect the combined values of all plans.

Data Entries:

There are no distributions from any defined benefit plans for the next 30 years.

Child Support Received Report

Child Support received report for Harold J Jones or Marianne P Jones.

This amount is the Child Support payment specified, annualized.

Child Support increases annually for inflation if so indicated.

If modifications in child support occurring at specific times are indicated, those modifications are reflected as well.

The first year payment may reflect voluntary or pendente lite payments entered.

Data Entries:

From 2005 to 2023, child support in the amount of \$1,726 per month is specified.

These amounts are specified not to increase with inflation.

Child Support is specified to be received by Marianne from Harold.

Debt Payment Totals Graph:

Investments assets report for Harold J Jones or Marianne P Jones.

The total here is the amount entered as "current market value" of each investment.

The percent each spouse will keep is specified for each investment as well.

The asset values shown in the report reflect increases for growth at the rate specified for each asset.

If securities are sold to cover negative cash flow (expenses in excess of income) then the value of the securities shown will decrease by the amount sold.

If securities are sold to cover negative cash flow, the software sells them in the order the securities are listed.

Securities, and IRAs used to cover negative cash flow are shown in the report entitled "Liquidations to Cover Negative Cash Flow."

Report on Equity in Residences

Report on equity in residences for Harold J Jones or Marianne P Jones.

This is the total amount of equity on each home entered.

Equity is calculated as: value less current mortgage balances and projected refinancings.

Residence	Home Value	First Mortgage	Second Mortgage	Equity in Home	Harold Amount	Marianne Amount
40 Winding Way	\$450,000	\$320,000	\$0	\$130,000	\$0	\$130,000
Vacation Home	\$100,000	\$18,750	\$0	\$81,250	\$81,250	\$0
Total Residence Equity	\$550,000	\$338,750	\$0	\$211,250	\$81,250	\$130,000

The following lines show equity in each residence for each spouse projected to future years.

Note: Mortgage balances shown are "year end" and may not not exactly match the "current" mortgage numbers.

Notes (Debt) Between Spouses Report

Report for notes (debt) between Harold J Jones and Marianne P Jones.

There are two categories of debt between spouses: business debt and debt related to the home.

Business debt between spouses includes the following:

- The amount of any buyout note that the selling party will receive.
- For sole proprietorships, the amount of receivables that the selling party will receive.
- For partnerships and corporations, the amount of any 1-time buyout payment.
- For partnerships and corporations, the amount of any buyout note.
- For partnerships, the total value of any regular payments.
(This is the monthly payment * # months for payout.)
- For corporations, the total value of any preferred dividend payments.
(This is the annual payment * # of years.)

In the case of partnerships and corporations, there is an option to have payments made by the entity be subtracted from the buyer's income and assets. If this option is selected, then the value of buyout notes and regular payments appear as debt of the buyer as well as an asset of the seller.

Debt related to the residence, between spouses, counts as an asset only if:

- There is a mortgage on a residence; and
- The mortgage is being paid to the other party.

Data Entries:

Mary Kay franchise

Sole Proprietorship Business Entity type.
NO Option to deduct payments from buyer selected.
